

How important a role will energy technology play in Europe reaching its 20:20:20 targets?

Where 1 = not important and 10 = very important

Which of these technologies is most important to meeting Europe's energy targets for 2020?

- ① Alternative fuels and low-carbon solutions for transportation
8%
- ② Energy efficiency
65%
- ③ Wind and other forms of renewable power generation
27%

Which of these technologies is most important to meeting Europe's energy targets for 2020?

① Alternative fuels and low-carbon solutions for transportation

14%

② Energy efficiency

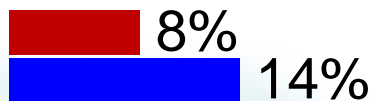

68%

③ Wind and other forms of renewable power generation

18%

Which of these technologies is most important to meeting Europe's energy targets for 2020?

① Alternative fuels and low-carbon solutions for transportation

② Energy efficiency

③ Wind and other forms of renewable power generation

■ Before

■ After

Which of these technologies will be most important for Europe's energy future in the medium term?

① Smart grids

② Advanced biofuels

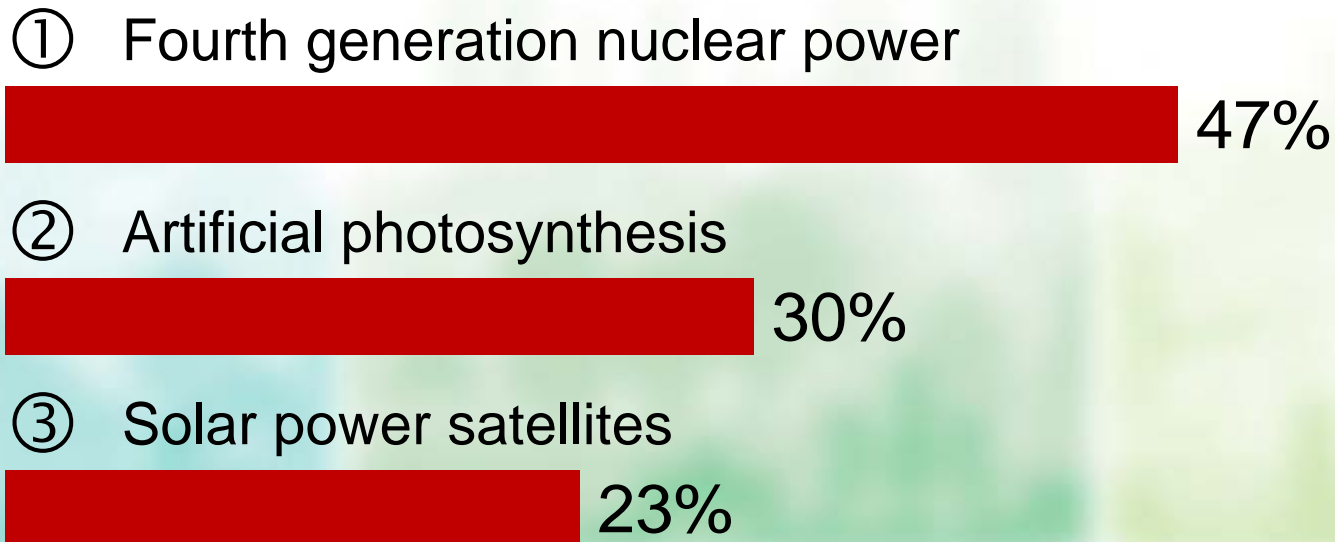

③ Carbon capture & storage

④ Thin film solar

Which of these advanced technologies could make the biggest contribution to creating a secure, low-carbon energy future for Europe?

Are you optimistic that the European Union will achieve a secure, low-carbon energy future by 2050?

① Yes

② No
